## 2014 THEATRICAL RELEASE

After a 40-year-old nationwide 'War on Drugs', the state of Washington becomes a key battleground in the fight to legalize marijuana. But many advocates of legalization are opposed to Measure I-502, the law that will permit the growing, sale and use of cannabis. They say it will impose harsh DUI laws, new taxes, and additional restrictions and penalties that will hurt medical marijuana patients and providers. These unexpected opposing forces make EVERGREEN a scintillating inside look at a political clash that exposes the economic and human impact of marijuana legalization
